

PRO-TECH[®]
TURF PUSHER

THIS WINTER TACKLE SNOW WITH PRO-TECH

- Can be used on natural/synthetic turf fields and field covers
- Clears snow with minimal disruption to crumb rubber
- Contains and stacks snow
- Minimal to no maintenance required
- Pin-on coupler allows for easy connection changes

Keep Your Sports Fields Green This Winter

The Pro-Tech Turf Pusher is the first containment plow designed specifically for clearing snow from both natural and synthetic turf sports fields. This lightweight but durable plow smoothly glides over the playing surface. The Turf Pusher can also be used to clear snow from field covers. Customers can now keep their sports fields operational at all times during the winter without the risk of delays or cancellations caused by snowfall.

Clears Snow Without Causing Damage

The Turf Pusher smoothly glides over both sports fields and field covers. When being used on synthetic fields, the Turf Pusher moves snow with minimal disruption to the crumb rubber. Customers can limit spillage and multiple passes often associated with conventional plows or brooms. The Turf Pusher can also stack snow, resulting in less piles and more surface area cleared.

Pin-On Coupler | Multiple Connections

The Turf Pusher's innovative pin-on coupler allows customers to easily switch their connection-type within seconds. This feature can be especially beneficial if a team owns several or more machines from different manufacturers. Multiple connection types are available (Universal, Toro, John Deere, Euro, Kubota).

CUSTOMER FEEDBACK

Since being introduced, the Pro-Tech Turf Pusher has become very popular among professional, college, and high school sports teams. Here are just a few of the kind words we've received about how customers love their Turf Pusher:

"We purchased two of the 8 foot Turf Pushers for our 5600 toolcats and are very pleased with them."
– Chuck Dietz, Maintenance Tech, University of Notre Dame

"We've tried PVC pipes, PVC pipes wrapped in rubber, rubber plow blades and nothing compares to the performance of the "Turf Pusher". This is not only the best way to remove snow from your turf but it is also the safest way to remove the snow."
–Bob Mangold, King's College

Maintenance Free

Unlike conventional plows and brooms, the Turf Pusher has no moving parts, which minimizes or can even eliminate the time spent repairing equipment.

Durability

The Turf Pusher uses fully welded construction that ensures strength and extreme durability. This also reduces corrosion from the inside out.

Keep Your Field Open All Year Round

The Turf Pusher allows customers to provide year-round access to their sports fields. Customers can save money by minimizing delays or even cancellations to scheduled sporting events.
